

Future Market & Requirements for Recovery Boilers

Kari Liukko, ANDRITZ Oy

Predicting the future demands and market for recovery boilers is challenging. At current state we can identify several macrotrends that influence not only the future of recovery boiler but also all other businesses and ourselves as individuals. This presentation will cover the current outlook of the recovery boiler business and requirements set by global pulp and paper customers. In the spirit of the 60 years anniversary of the Finnish Recovery Boiler Committee, the presentation is divided in five chapters to cover the main recovery boiler-related topics Safe, Intelligent, Capacity, Technology and You.
